Proposed to Physical Disability (PD)Changes:

1. Eligibility language modified and clarified to include documentation requirements
    a. In the event the disability determination does not clearly indicate a "physical disability", the State will allow for the provision of additional documentation to support the individual's physical disability. The documentation provided must have relevant information to support the person's physical disability.

2. Participants receiving services on the HCBS-PD program would transition to the HCBS-FE program when they reach age 65, consistent with other programs. Those currently on the HCBS-PD Program over the age of 65 would be able to remain on the HCBS-PD Program.
