POC Service Reduction Workload

Introduction

The POC Service Reduction workload page is where all requests are listed. The list is in an Interactive Report format, which gives the user a table view then allows the user to utilize filters and other reporting tools to create custom views of the data.

Security installed on the workload allows only the customers that are associated with the users’ organization to display. It will also give the organization one area to review statuses of requests submitted.

Quick Steps to select information:
- Click on the pencil/paper icon under the Open column to open the request.
- Click on any column heading for a quick sort or filter of the information.

How To

Follow the steps in the table below to access the workload for POC Service Reduction Requests. This is the workload where KDADS will access all requests submitted.

<table>
