

CBS in the Schools

Course Description

This course is aimed at introducing mental health professionals to information that will assist them if and when they interact with the educational system.

Course Objectives

Upon successful completion of the on-line course “Community-Based Services in the Schools” the participant will have received a score of at least 80% on the Post Test. To attain this score the participant will have a general understanding of:

- The educational system and the role of the mental health professional in interacting with the schools
- School system terms and acronyms related to special education
- Federal legislation that effects education including 504 and IDEA
- Available educational services for youth with special needs
- The process involved in accessing special educational services for youth with special needs
- The role of the mental health professional in the development of the IEP
- How the mental health professional can help parents/caretakers of youth with special needs to access special education services

Topics Covered in CBS and the Schools

- Terms and Acronyms Related to Education
- The Role of the Mental Health Provider in Education Planning
