PACE Programs of All-Inclusive Care for the Elderly

What is PACE?

The Program of All-Inclusive Care for the Elderly (PACE®) is designed for seniors with chronic care needs and their families to allow qualified individuals the opportunity to remain in the community for as long as possible.

PACE: a different kind of care

PACE is care that revolves around you. PACE was created as a way to provide you, your family, caregivers and professional health care providers the flexibility to meet the health care needs of elderly adults and to help them to continue living in their communities.

How PACE Benefits Consumers

PACE Provides Comprehensive Care:

PACE uses Medicare and Medicaid funds to cover all medically necessary care and services. Consumers can be enrolled in either Medicare or Medicaid, or both, to join PACE. They can also pay for PACE privately, if they do not have Medicare/Medicaid.

The Focus is on the Consumer:

A team of health care professionals will help participants make decisions to ensure a good quality of life. The consumers and their families will play an active role as the team develops and updates plans of care and goals for the program.

PACE Support Family Caregivers:

PACE provides care-giving training, support groups and respite to help families keep their loved ones in the community.

Paying for PACE

If consumers have Medicaid, they will not have to pay a monthly premium for the long-term care portion of the PACE benefit. If they don’t qualify for Medicaid but have Medicare, they will be charged a monthly premium to cover the long-term care portion of the PACE benefit and a premium for Medicare Part D drugs. Participants also are responsible for their Medicare Part B premium. However, in PACE there is never a deductible or co-payment for any drug, service or care that has been approved by the PACE interdisciplinary team.
