Senate Public Health and Welfare Committee

H.B.2552-Managed Care Organizations, Prompt Pay legislation

Shawn Sullivan, Secretary
Kansas Department for Aging & Disability Services

February 17, 2014
Payment Impact on HCBS providers

Home and Community Based Service (HCBS) providers are especially sensitive to a regular Medicaid revenue cycle.

- They rely upon Medicaid payments more than any other revenue sources (private pay, medicare, etc.)

As a result we have multiple layers of protection for those providers

- DD Provider payment monitoring
- Weekly phone calls
- Ombudsman’s Office
Examples of the IDD monitoring and implementation due to the high reliance these providers have on Medicaid revenue:

- **Plan of Care Authorizations**: MCOs will not deny claims for HCBS/DD plans of care authorizations that they have not received. Review process and then reinstatement of plans of care.

- **Date Span Billing**: During implementation, MCOs are relaxing their edits and providing increased training opportunities.

- **Third Party Liability**: Working with providers and MCOs to get blanket denials which can be used during Implementation.

- **Client Obligation**: Issues were identified and MCOs made appropriate process changes to accurately assign client obligation amounts.
In 2013, after some initial issues integrating the MCOs with Authenticare, timely processing was not a major issue with HCBS providers as a group.

This prompt pay bill would add another tool to assure providers that timeliness remains a key priority.
