

Wraparound Facilitation Training

The Structure of the Wraparound Team

Waiver Rules

- Waiver services are a unique set of services available for the child and family until specific goals related to the plan of care are met. While there are no time limits on waiver services, they last on average about nine months.
- For a child on the waiver Wraparound Facilitation is a required service.
- Wraparound Facilitation is only focused on those tasks that are involved in creating, reviewing and adapting the POC.
- Because Wraparound Facilitation is a separate service under the HCBS/SED Waiver, it is billed to Medicaid as a separate, unique service.
- Wraparound services involve the establishment of a wraparound team.
- Confidentiality is a right of the family and child.

While there often is a focus on the wraparound meeting itself, the truth of the matter is that much of the most time-consuming, most difficult and most significant part of your job is now behind you.
